ROOTED CLUMPS and PLANT LIST  
MAIL ORDER ONLY

62  
BASIC LIST FOR 1958

DOROTHY A. YOUNG

2937 Rutland  
DES MOINES 11, IOWA

LIBRARY  
RECEIVED  
★ JAN 20 1958 ★

Rooted clumps of the following varieties to be sent by parcel post, special handling. If you wish Special Delivery or Air Mail service add the charges for same. 45c extra for Special Delivery—check with your local post office for charges on air mail per pound for your zone. ALL ORDERS MUST BE ACCOMPANIED BY A 75c HANDLING FEE. This fee will help to cover packing expense, postage and special handling and no order will be accepted unless this handling fee is included. Iowa customers must also include 2% tax as required by state law—unless you are a dealer and have a sales permit, in which case please give us your permit number for our records.

Orders will be filled in the rotation in which we receive them—those reaching us first will be filled first—please do not ask us to deviate from this rule. We will start to ship as early as weather permits in the spring—it usually takes about six weeks to become “caught up” on winter and spring orders. After that period orders will go out within a day or two of the time they reach us. We do not acknowledge orders—your cancelled check is your acknowledgement. WE SHIP ONLY TO CONTINENTAL U. S. We do not ship during cold weather.

When ordering, please list a few substitutions. We do not substitute unless absolutely necessary, but reserve the right to do so unless you have stated otherwise, in which case we will make refund if necessary.

Our rooted clumps are PLANTED LEAVES WITH YOUNG PLANTLETS ATTACHED—*whatever the leaves have produced* in a minimum of four months. The exception to this is an occasional very new variety or a slow growing variety, in which case you will receive a well rooted leaf which should produce plantlets for you within a very short time. We think it would be better if you did not separate young plantlets from the mother leaf immediately—let them grow on as received for a sufficient time to become acclimated to their new surroundings—then follow your usual methods.

We guarantee safe delivery of your orders but cannot be responsible for their performance after you have received them, as we cannot control the conditions under which they will be grown after leaving us. If your order is damaged in transit or otherwise not in good order, please return immediately for adjustment or refund. No adjustment will be made unless this is done immediately.

You will notice that we have several pink and white varieties offered. They are lovely things and we recommend them—however many of them do have a tendency to go back to solid coloring. As time goes on they will probably become more dependable. The words “red” and “rose” are often misleading to those uninformed about African Violets. There is no true red. “Red”, as applied to African Violets means plum, maroon, wine, etc. Usually when “Rose” is used as part of a name or in a description it means an orchid-rose or lavender-rose, NOT deep pink as many seem to think. We offer this information in an effort to not mislead. Recently many varieties have come upon the scene with a chartreuse edge or fringing. Again—the chartreuse is not dependable under all conditions. As a general thing we think it depends on the conditions under which they are grown. If the bloom does not have the chartreuse edge, then try another location for your plant and see if it does not perform more satisfactorily.

When foliage is not described it is of standard type.

ROOTED CLUMPS

50c each unless otherwise specified. 75c handling fee must accompany all orders. Please read the preceding paragraphs carefully before ordering. LIMIT 2 of a variety.

\*Signifies double pink bloom.

AFRICA—large dark red-backed, waved and notched foliage. Flowers blue, often chartreuse edged. 75c.

- HEAVY SEAS—wavy dark girl foliage, orchid blue bloom, darker center. 75c.
- IRISH VELVET—clusters of fluffy light blue double on wavy red backed foliage. 75c.

## PLANTS

As most of our customers know, we suffered a very disastrous fire a few months ago and greenhouse and all plants were completely destroyed. Since then there has not been sufficient time for us to build up much of a backlog of plants. At present we have less than five thousand on hand, but we offer them to you, in the following varieties, as long as they last, at 50c and 75c. We can offer no discount for quantity buying. Suggest that when you order plants you name a substitute or two—it might help us a great deal in filling your order. All plants will be shipped by parcel post, special handling. A 75c handling fee must be included on all orders of ten or less plants. From ten to twenty plants, add an extra quarter, making a total of \$1.00, \$1.25 for 20 to 30 plants, etc.

These are in 2" pots, some may be in bloom, some not—they are young plants and should bloom soon for you. Limit, 2 of a variety to an order.
